Congratulations on a very well made product!

~Stan, FL

You were right! No odor! Amazing!

~Mil, OH

We use "The Head" on our boat. We love it! Send me another toilet!

~Michael, FL

Great concept! I use "Nature's Head" in my workshop. It is sanitary and has no odor! Our local Health Department was even impressed!

~Mike, OH

New Product!

# “Nature’s Head” Composting Toilet

Patent Pending

This is a  
“made in the USA”  
product.

The development of “The Head” refined the concept of the composting toilet to produce a user friendly, more economical, more aesthetically pleasing toilet.

1. No holding tank, no pumpouts, no odors, no clogging, no kidding.
2. “The Head” has a unique molded design (with a gray granite color) and incorporates stainless steel components and hardware into a high quality product.
3. This composting toilet is self-contained and waterless.
4. Uses 1½-2 gallons of peat moss in the base for your composting matter.
5. Because of the waterless urine separating design, this unit has extraordinary holding capacity. This could translate into a month usage by a cruising or traveling couple, or perhaps an entire boating or camping season of weekends.
6. “The Head” is very compact and space efficient measuring 13” wide at the base, 17¾” front to rear, and is just under 20” tall.

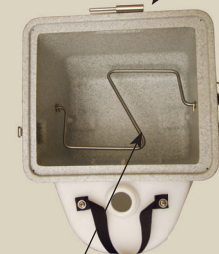

— **Plus!** Easy installation in most applications, simply mount brackets to floor, vent unit to outside, and hook to 12V power source! (Several options available.)

Just under 30 lbs.
